

The leading 2D/3D platform to deliver complex projects with greater confidence and control.

# The Revizto story

Founded in 2012 in Lausanne, Switzerland, Revizto began with a simple belief: construction teams deserve a clearer, more efficient way to work. The industry builds the most important structures in the world, yet too many teams still rely on tools built for a different era.

Despite billions invested, teams still battle delays, cost overruns, and constant communication breakdowns. As projects grow larger and more complex, the tools meant to support them remain fragmented – forcing skilled professionals to work in silos and stitch together information that should already be connected.

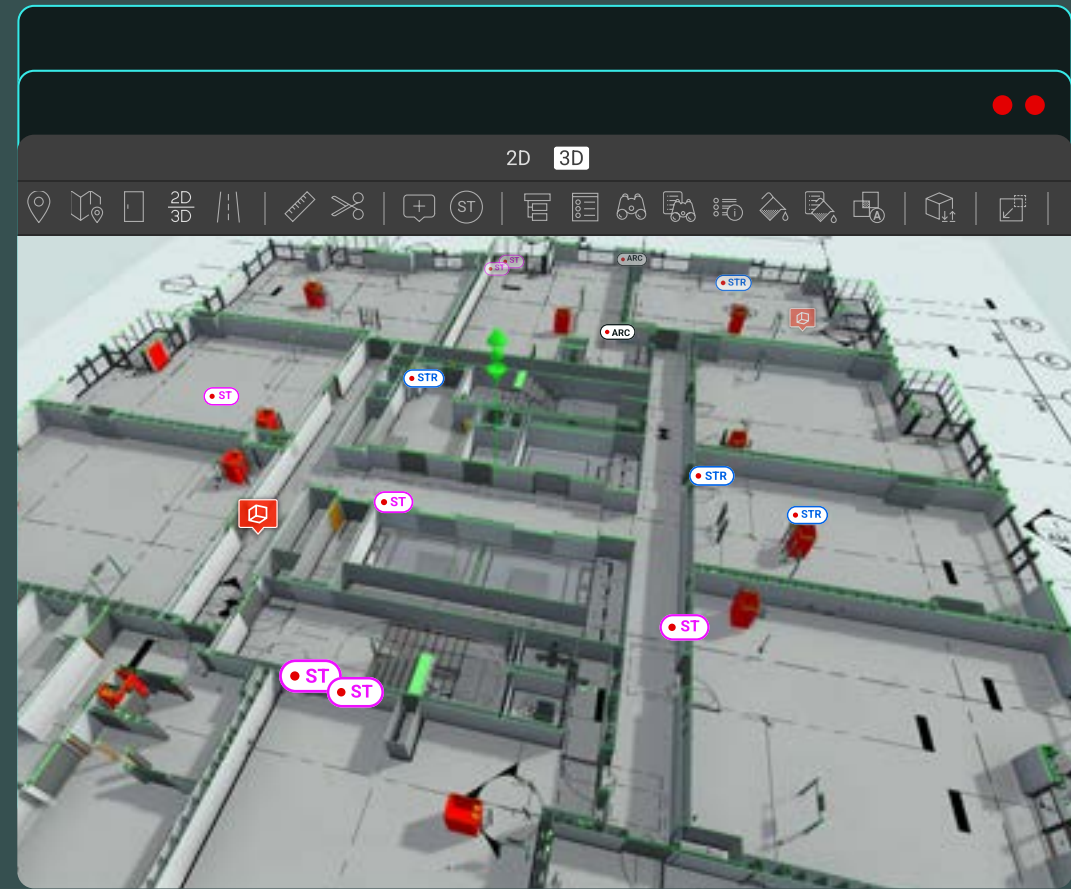

Revizto was created to bridge that gap. We bring clarity to complexity by unifying the people who build the world's most important infrastructures. Unifying architects, engineers, contractors, and owners into one shared 2D/3D workspace, so they can deliver ambitious projects on time and on budget – without risk or waste.

# Revizto Collaboration Hub

Real-time context that protects design intent and reduces project risk at every stage.

Name	#	Group	Active clashes	Priority	Grid intersection
> Level 7	1		164		MM-M3, MN-M3
> Level 6	1		42		ML-M5, MM-M3
> Level 6	1		8		ML-M3
> Level 5	1		184		ML-M4, MM-M3
> Level 8	1		248		MK-M4
> Level 9	1		184		MK-M4
> Level 4	1		152		MK-M2
> Level 11	1		28		MK-M1, ML-M2
> Level 4	1		34		MK-1

## UNIFIED 2D/3D ENVIRONMENT

Unite 2D drawings and 3D models into a single, intuitive environment for full project context and collaboration.

## COLLABORATIVE CLASH AUTOMATION

Get the new standard in clash detection—full flexibility, control, and the power to automate.

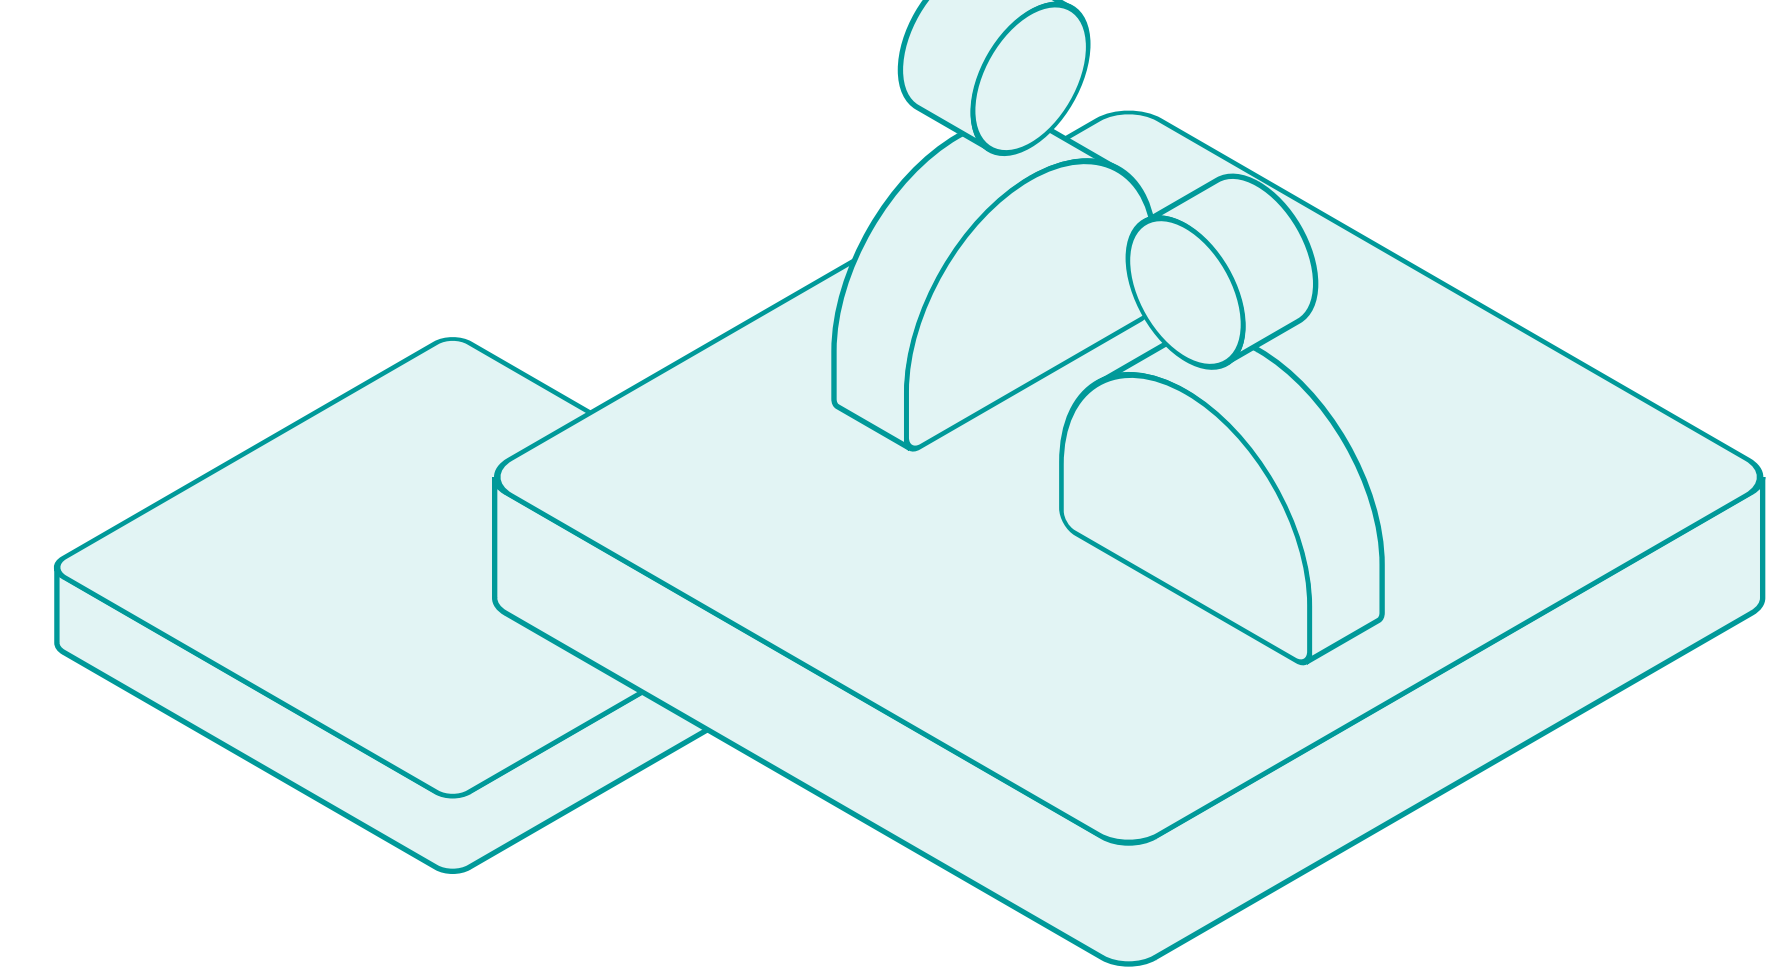

## INTEGRATED ISSUE MANAGEMENT

Create, track, and manage tasks and issues in 2D or 3D from any device, with each issue synced to its exact location within the unified environment.

## CONNECTED PROJECT INTELLIGENCE

Access real-time project insights and trends through charts, dashboards, and API data connected to your company's business intelligence.

# What our users love

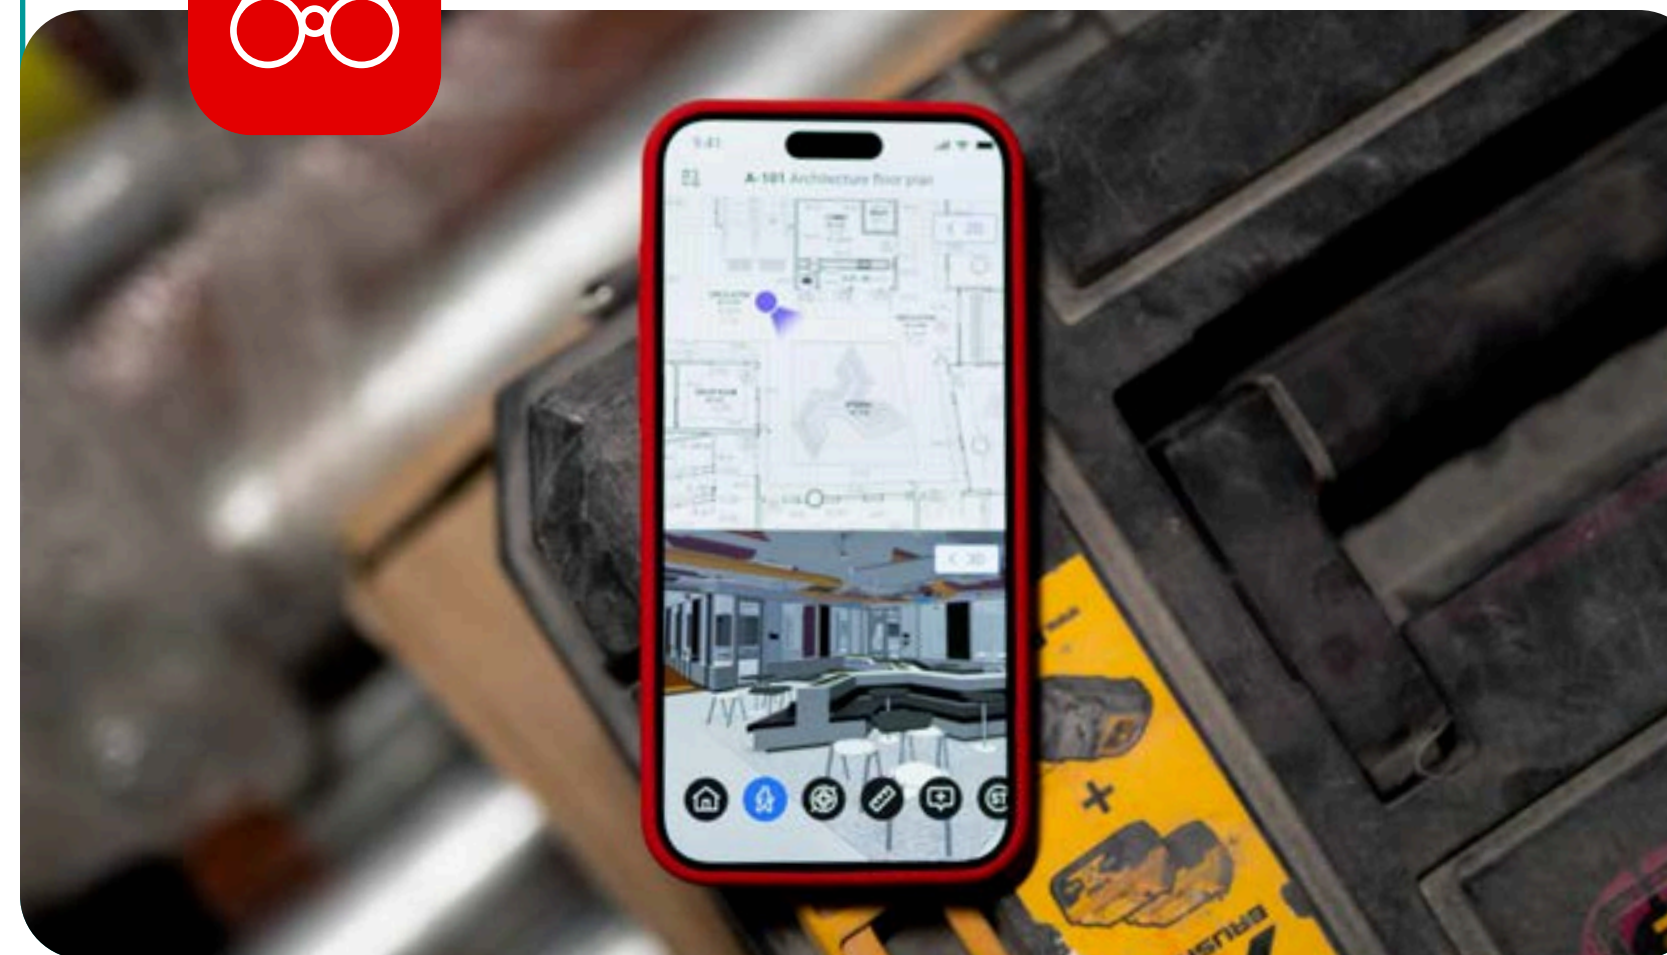

## Quick implementation & adoption

Revizto is fast to deploy and easy to learn, getting your projects up and running within a day.

## Seamless model navigation

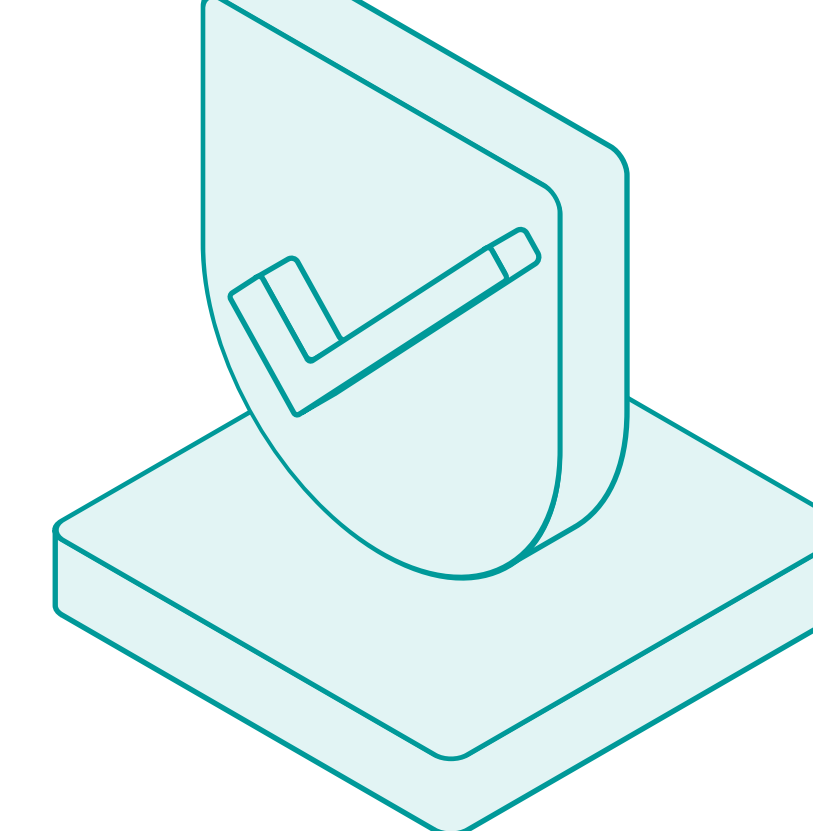

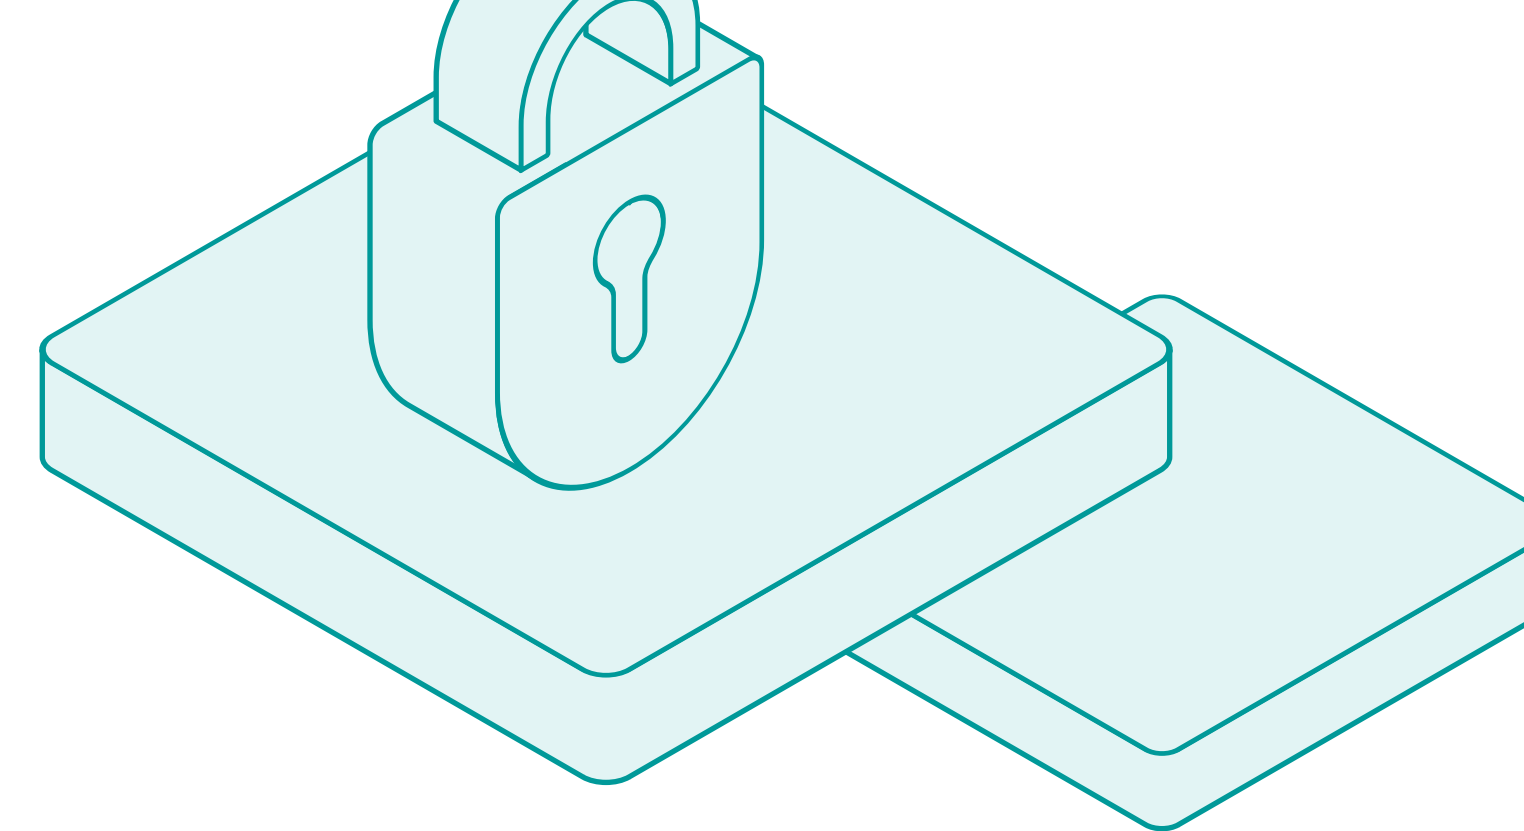

Revizto makes model navigation fast, intuitive and unbreakable – for everyone from designers to field teams to external stakeholders.

## Bring your own workflow

Revizto seamlessly integrates with the tools and processes your team already uses. There's no need to change how you work.

# Made secure. Made to scale.

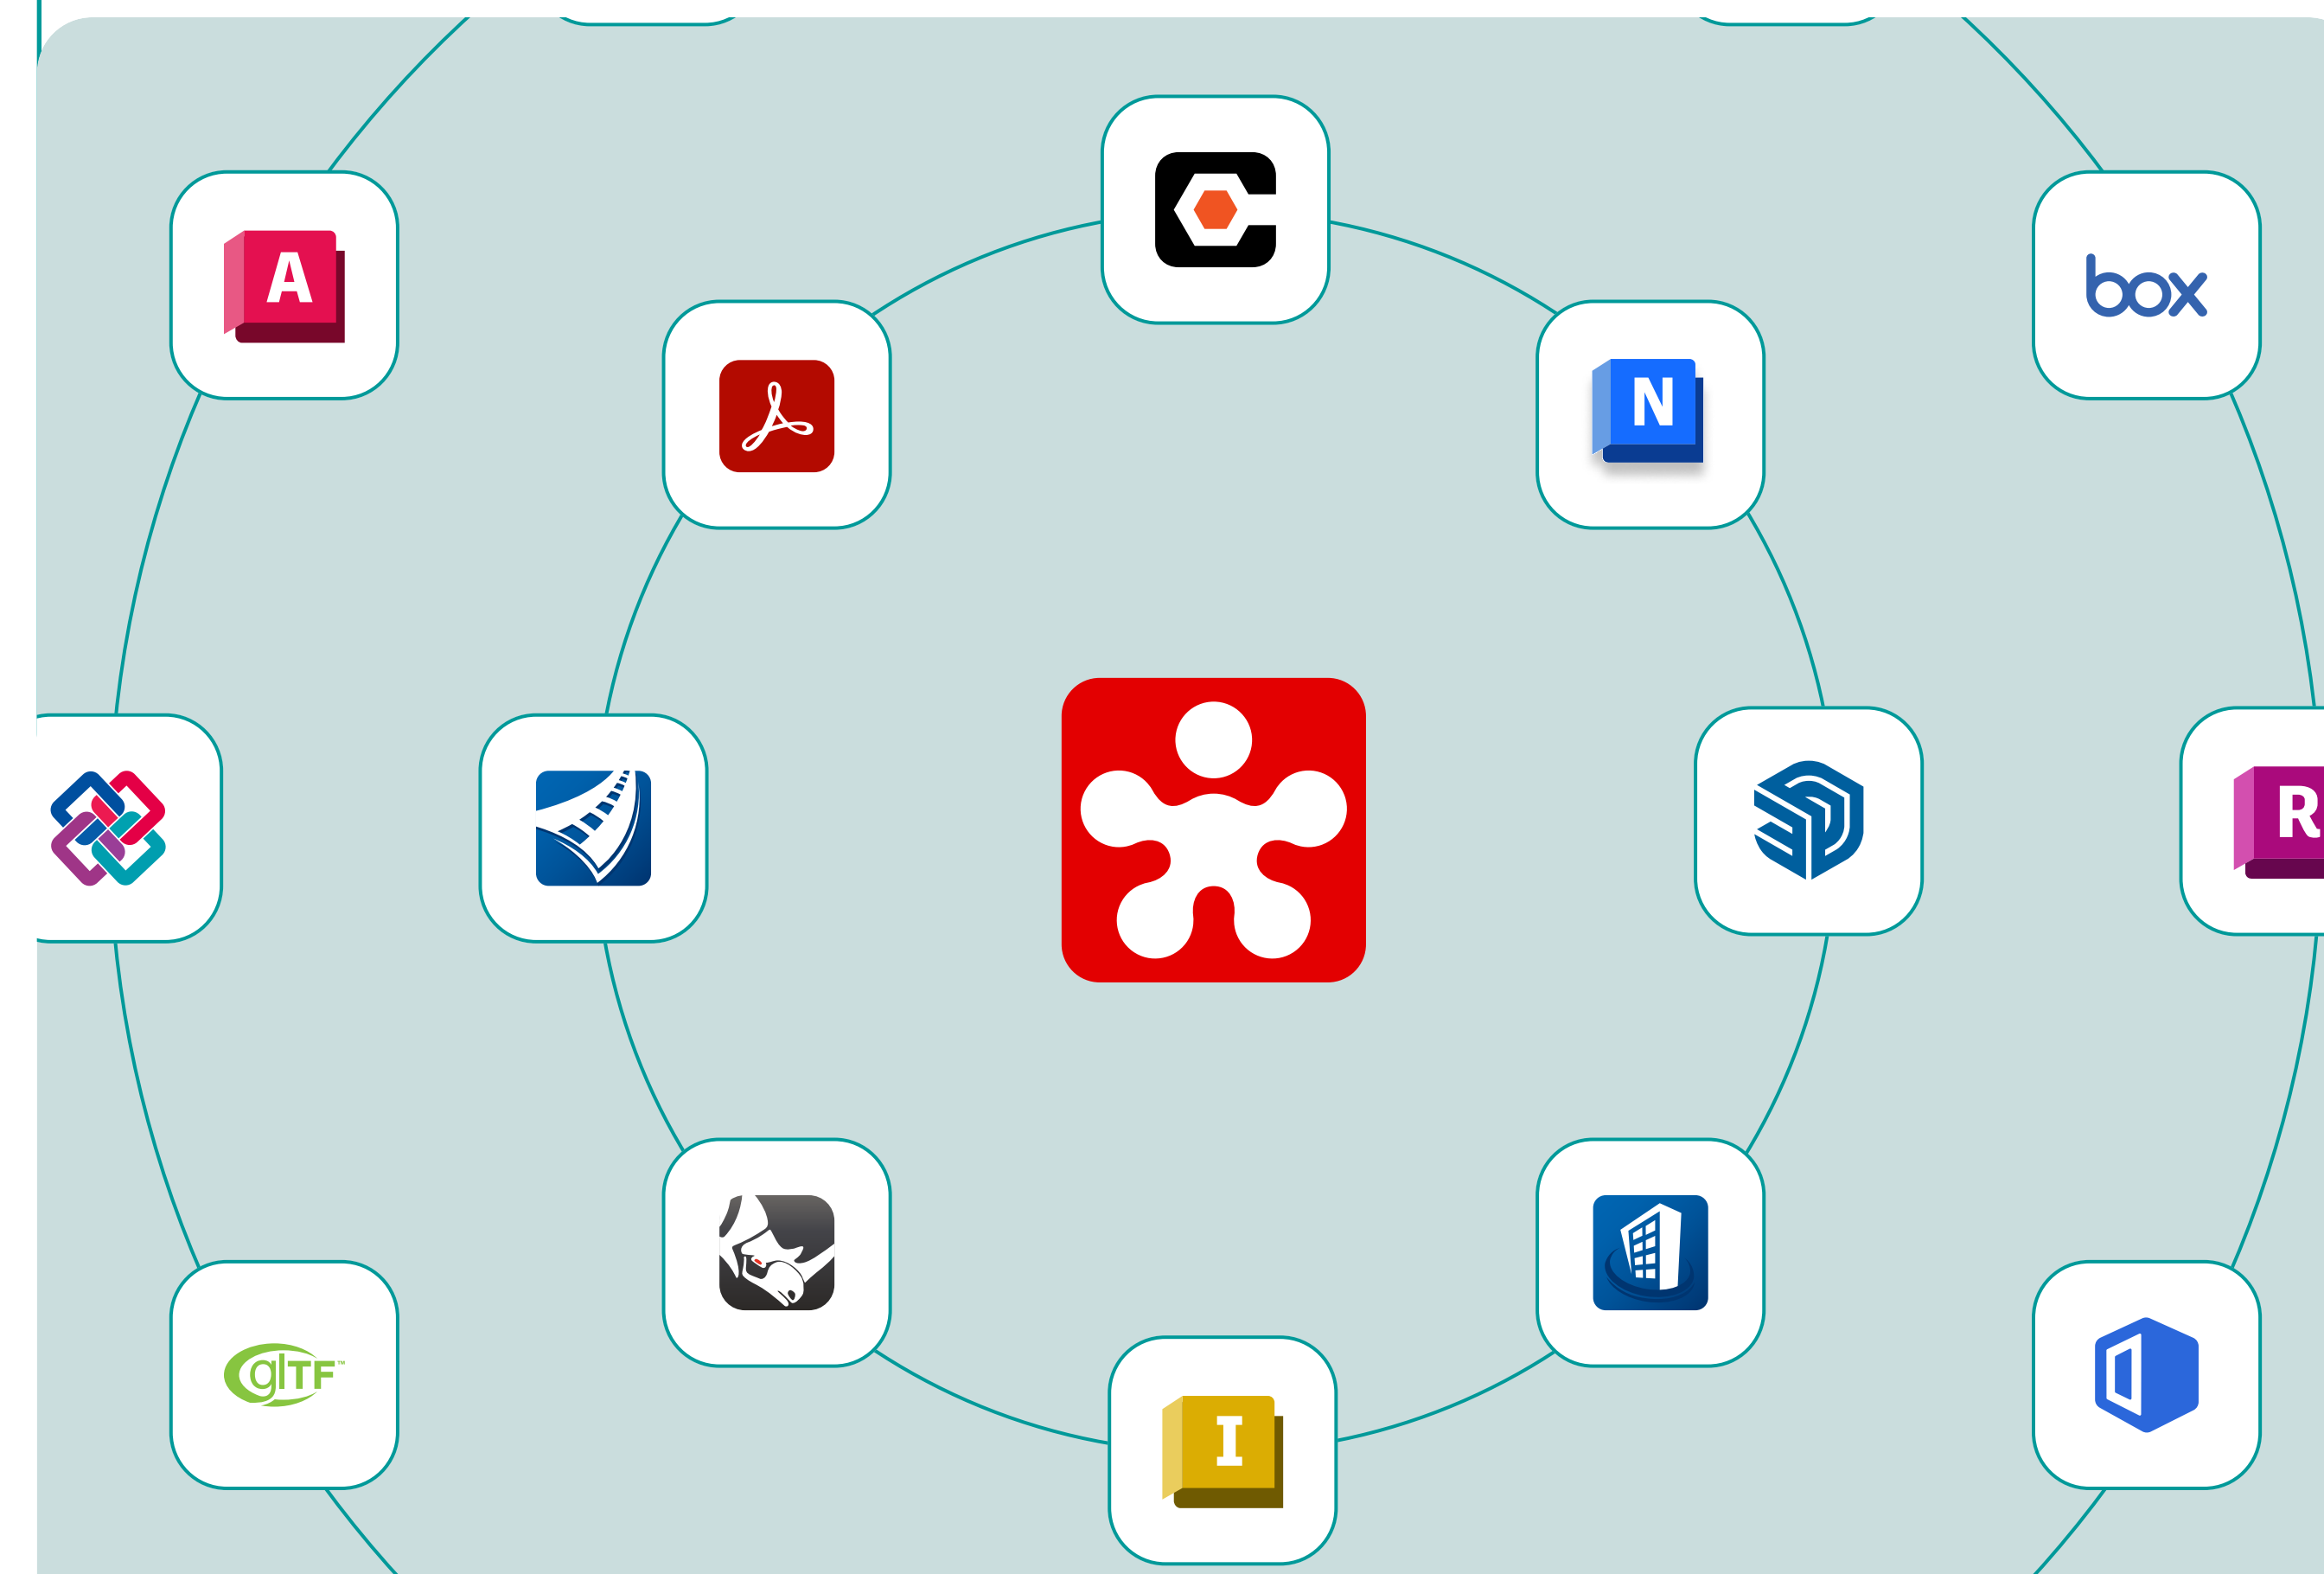

## Enterprise-grade security you can trust

- Project data belongs to you
- Data is hosted on secure servers in your chosen region
- Robust continuity and redundancy measures ensure projects stay up and running

## Interoperability without compromise

Revizto meets your existing tech stack where it is, with no disruption to how work gets done. Teams adopt it fast, and the redundant tools quietly disappear.

# Over 80,000 projects worldwide have been built with Revizto
